

GLOBAL INTERNET SIM CARD

Enables internet connection to EOL Zenith

Having trouble getting local SIM cards that offers Internet connection to your data loggers? Do you have unpredictable budgets for communication costs? Problems getting contracts with local GSM operators? Projects in several different countries?

Because of the extensive number of our customers with wind & solar measurement campaigns in several different countries we know that many of you find it difficult to acquire local SIM cards with the optimal settings and local GPRS / 3G coverage.

We have listened to your feedback and the need for a more effective way to handle this.

Our engineers have been working on this for a while and have come up with a solution for a single SIM card that offers Internet connection to your data loggers and works in practically all countries worldwide. A single SIM card that checks for all the available local GPRS / 3G signals and automatically connects to the operator with the best coverage. This has in many cases demonstrated to improve and simplify communications compared to conventional SIM cards that just work with a single operator.

Benefits with our new Global Internet SIM card:

- Internet connection to all your data loggers
- Faster download times
- One solution for all your sites
- Automatically checks for best local GSM operator
- Get the most out of EOL Manager including automatic data transfers
- No more talking to your local GSM provider
- Cost effective. No monthly data plans. Fixed yearly costs.

With this SIM card you will be able to use all the powerful features in the EOL Zenith data logger and management software, EOL Manager.
