

GUIA DE INSTALAÇÃO

EOL Zenith Wiring Panel

Itens necessários para a instalação. Todos os itens de B a E estão incluídos na caixa juntamente com o Wiring Panel.

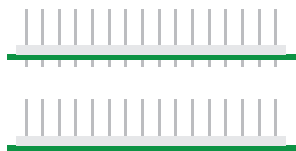

A EOL Zenith data logger com terminais

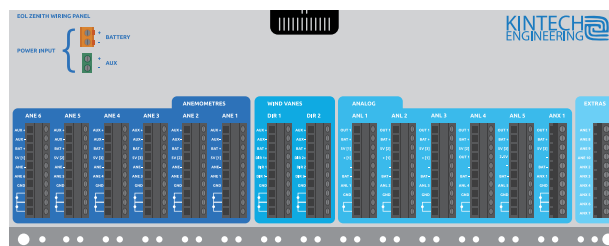

B Suporte metálico para o Wiring Panel

C Placas de interconexão x2

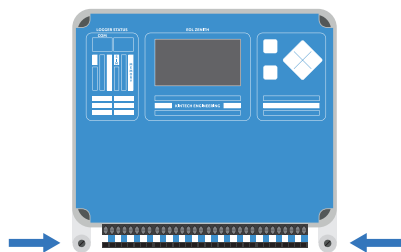

D Wiring Panel

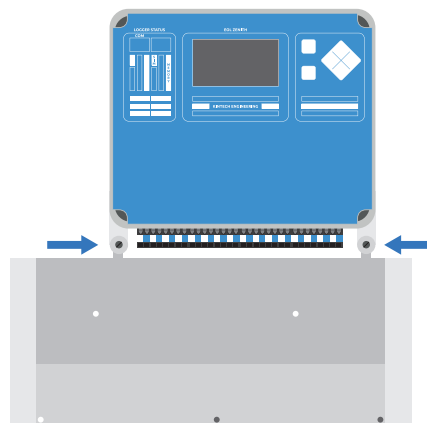

E Rebites

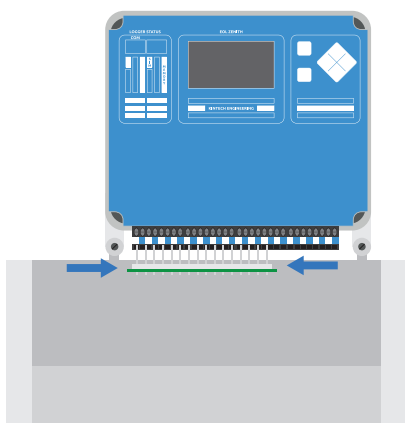

- 1 Identifique os parafusos inferiores que prendem o data logger.

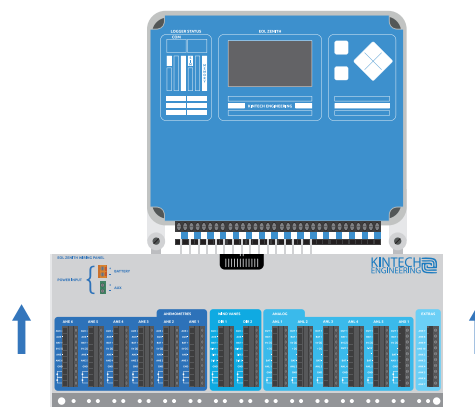

- 2 Retire o data logger e use os parafusos inferiores (M5x20) para instalar o suporte metálico.

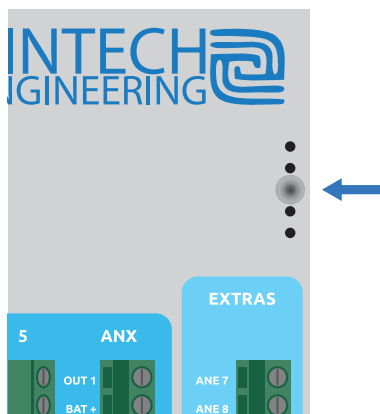

- 3 Montar as placas de interconexão no data logger. Os terminais Digital Input 1 e Digital Input 2 estão livres.

- 4 Deslize o Wiring Panel para o suporte metálico até que o conector preto do Wiring Panel seja inserido nas placas de interconexão.

- 5 Coloque os dois rebites no Wiring Panel para prendê-lo ao suporte metálico.

- 6 Parafuse os separadros desde o Wiring Panel ao suporte metálico.
